- Notes: 1. One case of wine equals 2.377548471 gallons.
 2. Net imports is domestic consumption minus domestic production. Negative net imports indicates exports > imports.

- Source: 1. Population data 1993 to 2012 Economic Report of the President, 2013; year 2013 World Population Statistics.
 2. Wine consumption data from Wine Institute. Includes domestic and imported still wine, sparkling wine, and sake.
 Value is estimated retail value that includes markups by distributors, retailers, and restaurants.
 3. Wine production data from Wine Institute. Includes removals of still wine from fermenters.

4. Wine export data from Wine Institute. Value is winery revenue from exported wine.
5. Wine imports calculated as total consumption minus total production.
